Business Enabler

Ashok Kumar

Platform Product Owner | AI/ML Product Manager | Engineering Foundation + CSPO, AWS Certified| PMI-ACP | 10+ Years Engineering-to-Product
Chennai, Tamil Nadu, India

Summary

I help engineering organizations ship faster and more reliably by bridging product thinking with deep platform and cloud expertise. With 11 years in DevOps engineering, I've evolved into a Platform Product Owner — owning roadmaps, driving stakeholder alignment, and delivering enterprise-scale capabilities that accelerate software delivery.At Fidelity Investments, I lead the DevOps platform roadmap serving thousands of developers, enabling CI/CD quality, cloud-native migration, AI-enabled automation, and disaster recovery at scale. My edge: I can write a user story in the morning and debug a Kubernetes config in the afternoon — blending product vision with technical execution. Certifications & Recognition- Certified Scrum Product Owner (CSPO)- AI Product Owner Certification- Scrum@Scale Certified Practitioner- AWS Certified Solutions Architect- Business Enabler Award — Fidelity Investments Product Management Strengths- Product Strategy & Vision- Product Discovery & Problem Definition- User & Customer Research- Roadmap Planning & Prioritization- Requirements Gathering & PRD Creation- User Stories & Acceptance Criteria- Backlog Management & Sprint Planning- Agile & Scrum- Stakeholder Management- Cross-functional Team Leadership- KPI & Product Metrics- Experimentation & Continuous Improvement- Data-driven Decision Making- Go-to-Market Strategy Selected Impact- Built a cross-account S3 migration platform handling 10M+ customer files at 40,000 files per 10 minutes- Automated end-to-end Disaster Recovery, eliminating manual and high-risk processes- Operationalized AI/ML pipelines in collaboration with data science teams- Improved Developer Experience through reusable Terraform modules and self-service infrastructure# Tools Jira | Confluence | Figma | Miro | AWS | Kubernetes | CI-CD | Terraform | Jenkins | Docker | SQL | AI/ML | Product Analytics Tools (Mixpanel, Amplitude) | Collaboration Tools (Slack, Teams) Open to: Product Owner / Product Manager

opportunities across Platform, Cloud, Developer Experience, Enterprise Technology, and AI/ML products

Experience

Fidelity Investments
Lead Software Engineer - Devops
April 2023 - Present (3 years 7 months)
Chennai, Tamil Nadu, India

Own the DevOps platform roadmap and backlog for Fidelity's enterprise engineering org, acting as Platform Product Owner across CI/CD, cloud infrastructure, and AI-enabled automation.
Key wins: Migrated 10M+ encrypted customer files at 40K files/10 min; automated end-to-end disaster recovery eliminating manual risk; led PI planning and sprint governance across distributed Agile Release Trains. Rolled out GitHub Copilot and multi-agent AI tools org-wide to measurably accelerate delivery.

Key achievements:
- Engineered a cross-account S3 migration platform, securely transferring 10M + encrypted customer files at 40,000 files per 10 minutes
- Automated end-to-end Disaster Recovery using Apache Airflow, converting a manual, high-risk process into a zero-touch capability and significantly reducing recovery time
- Established governance-driven CI/CD release processes with security compliance and audit controls, raising engineering standards org-wide
- Adopted GitHub Copilot and multi-agent AI coding tools across the team to accelerate development and testing workflows

Product & program leadership:
- Lead Agile Release Trains (ARTs) — PI planning, backlog refinement, sprint execution, and distributed team coordination
- Proven expertise across Technical Product Management, Project Management, Agile Coaching, Release Train Engineering (RTE), Scrum Leadership, and Program Delivery, with a strong focus on AI-enabled workflow optimization and engineering productivity
- Implement AI-driven automation solutions integrated with JIRA to streamline delivery workflows

- Mentor and manage associates; own delivery governance, roadmap prioritization, risk mitigation, stakeholder communication, and continuous improvement initiatives
- Manage a multi-service AWS portfolio (EKS, ECR, Lambda, DynamoDB, SNS, SQS, S3, IAM, Route53, EC2, EBS, EFS) driving cost optimization and operational excellence

Tata Consultancy Services

1 year 7 months

Associate Technical Product Manger

March 2022 - March 2023 (1 year 1 month)

Chennai, Tamil Nadu, India

* Gathered and documented business requirements.
* Worked with stakeholders to identify process improvements.
* Converted business needs into functional requirements.
* Supported Agile delivery teams.
* Created process flows and documentation.
* Performed data analysis to support business decisions.
* Coordinated UAT and production releases.

Senior Devops Engineer

September 2021 - March 2022 (7 months)

Chennai, Tamil Nadu, India

DevOps Engineer:

• Design, Develop, Debug, Test & Implement fully Automated Product Stack Deployment right from Code-commit, Build,
Packaging, Deployment, Regression Suite and Delivering the Product to Customer, through CI-CD (Development to Delivery)
using Jenkins Pipleine across multiple releases from scratch.

• As a DevOps, the priorities are to keep control on all the testing, development and production environment servers using UNIX, shell scripting.

• Experienced in installation, setup, configuration, maintenance & troubleshooting on Red Hat Enterprise Linux, CentOS.

Cognizant

AWS Devops Engineer

October 2015 - September 2021 (6 years)

Chennai, Tamil Nadu, India

System Engineer-DevOps :

• Implementation/setup continuous project build and deployment delivery process using Git, Jenkins, Tomcat
• Configuring new jobs in Jenkins as per the requirement from dev team.
• Automated build & deployment and CI process for many projects from scratch.
• Experience in creating custom sized VPC, subnets, NAT, EC2 instances, ELB and Security groups
• Created folders in buckets and adding objects to buckets and folders and adding permission to S3 storage
• Configured a S3 bucket for hosting website
• Configured a CloudWatch logs and Alarms.
• Automated CI/CD in AWS using code deploy and code pipeline.
• Hands-on experience in migrating on-premises server to AWS Cloud using Cloud Endure.

Education

Francis Xavier Engineering College
Master's Degree, Computer Science · (2012 - 2014)

scad college of engineering and technology
Bachelor's degree, Computer Engineering · (2007 - 2011)

SCAD College of Engineering and Technology
Bachelor of Computer Engineering
